EXPERIENCE

Credit Suisse, Morrisville NC — *Fullstack Developer*

July 2017 - PRESENT

- Designed, developed and unit tested a web application that allows users to disclose outside business activities. The application was released globally and developed using ReactJS, Java 11, Spring Boot, Jenkins, JPA, Hibernate, and Oracle.
- I created the Jenkinsfile for this project to deploy after each new commit and documented the process for others.
- I am working on getting the application deployed on an OpenShift container.
- Designed, developed and unit tested a web application used daily by thousands of users that provides access to compliance tasks and content. The application was released globally and developed using ReactJS, Java 8+, Spring Boot, Netflix Zuul Gateway API, and Oracle.
- Designed, developed and unit tested a web application that was used for an in-house IT Expo using ReactJS, Java Spring Boot, and MongoDB.
- Designed, developed and unit tested a web application that allowed users to view data-rich dashboards using Angular5, Java, Spring Boot, and Oracle.
- Worked on a project which provided guides, best practices, and boilerplate code to new joiners so they could quickly come up to speed on Credit Suisse's tech stack.

EDUCATION

East Carolina University

Greenville, NC — *B.S., Computer Science* - May 2017

TECHNICAL SKILLS

- Java
- JavaScript
- REST
- Spring Boot
- ReactJS
- Jenkins
- Openshift
